

Geology Students Visit To Kinabalu Park, Kundasang

Article by: Hazerina Pungut

On 15th December 2013, the annual field trip to Kinabalu Park was held participated by 3rd year Geology students. The trip was one of the requirements needed for SG31303 Geotourism course. The students were led by Prof. Dr. Felix Tongkul with his assistant by Mdm Hazerina Pungut. The objective of this field trip were for students to expose and understand the management of a geosite and recommendations on how it can be developed as geotourism attraction. The trip started with visiting Sabah Park's Exhibition Hall then proceed to view slideshow and question and answer session provided by park member, Mr. Alim Diun from the Research and Education Department. The visit continued to Kinabalu Natural History Gallery, where it exhibits the diverse flora and fauna, rock varieties and local cultures in and around Kinabalu Park. Through this visit, students were able to understand better the theories of geotourism that they have learned in classroom.

Students understanding the geology of Mt. Kinabalu.

Talk by Kinabalu Park officer, Mr. Alim Diun.
