

PROBLEM-BASED LEARNING WORKSHOP

Problem Based Learning workshop is one of the important programme that was organized by the Department of Medical Education and Allied Health Sciences, School of Medicine, Universiti Malaysia Sabah. This workshop was held at Grand Borneo Hotel on 28th-29th June 2010. The main purpose of this workshop was to generate another new set of Problem-Based Learning cases to be used for teaching and learning. The workshop was conducted by Prof Dr Dilip Murthy. Furthermore, each group presented their trigger material and the learning

outcomes, which were discussed by all participants at the workshop for clarification and refinement. A total of 12 New PBL packages were constructed over the two days of the workshop. New PBL cases constructed are Delirium, Mania with tremor, Temporary hemi-paresis, Neck swelling, Acute abdomen, Haematemesis, Palpitation, Chest pain, Child with walking difficulty, Dizziness, Infertility, Bleeding per vaginum and Hypertension in pregnancy.
