Knowledge Sharing Session on MATLAB and SIMULINK

Faculty of Science and Natural Resources (FSSA) in collaboration with Techsource System Sdn. Bhd had organized a Knowledge Sharing Session on MATLAB and SIMULINK on 16th October 2014. This seminar is held at the seminar room of FSSA starting at 9 a.m. This seminar had received overwhelming responses from the lecturers, postgraduate and also undergraduate students, particularly those from program of Physics with Electronics and Mathematics with Economics. This seminar is started with the introduction to MATLAB and SIMULINK. This is then followed by the knowledge sharing on the MATLAB toolboxes for research purpose. Potential application of MATLAB and SIMULINK in selected topics is discussed after the refreshment. The topics discussed included the Renewable energy, Solar and Wind Turbine model, Communications systems and Artificial Intelligence with Matlab. The participants were provided with a good opportunity to discuss the issues related to the handling of their data and also modeling at the end of the session.
