

## **WORKSHOP OF TOURISM DEVELOPMENT**

A research group led by Dr. Janie Liew, who is currently working on 2 projects, held a workshop on 26 August 2008 to update their current research project. The venue of the workshop was at the Pacific Sutera Resort. Amongst the participants in the workshop were District Officers from local authority offices and several tourism industry players. The main objective of the workshop was to table the initial outcomes from the research and to obtain feedback from the local authorities and industry people. It is also to bring together at the regional, national tourism representative, industry player and planning officials to examine and discuss current and emerging sustainable tourism policy issues and priorities in their national level and regional contexts and provide valuable inputs and recommendations for inclusion in the final report.
