WEDNESDAY, 8 OCTOBER – A group of Postgraduate Master's students from the Faculty of Computing and Informatics (FKI) Universiti Malaysia Sabah Labuan International Campus (UMSKAL) had recently organised a programme on Moral Values for Children through Video Games at UMSKAL's Computer Lab.

A total of 73 children from Taman Bimbingan Kanak-kanak (Tabika) KEMAS at the Federal Territory of Labuan accompanied by their teachers attended the programme.

Other kindergartens involved in the activity were KEMAS Kindergarten Kerupang, KEMAS Kindergarten Kg. Pantai, KEMAS Kindergarten Sg. Bedaun and KEMAS Kindergarten Sg. Lada.

The programme was designed to help a study conducted by FKI Masters students to study the application or moral values by using video games to children.

The programme was the first involving UMS and KEMAS Kindergarten Labuan. – *SS (fl)*
