TUESDAY, 20 JANUARY – Universiti Malaysia Sabah (UMS) in collaboration with Rafale International today organised a 'Rafale Techno-Day' held at the Auditorium of the Faculty of Medicine and Health Sciences (FKSK).

According to Rafale International Programme Director for Malaysia, Daniel Fremont, the programme aimed to share advances in defence technology with the people of Malaysia.

“This sharing focuses on nanotechnology, and breakthrough in airborne radar and electronic warfare systems. The event also highlights the commitment of Rafale to Malaysia and opportunities for joint collaboration,” he said when delivering his speech at the event.

Meanwhile, Deputy Vice-Chancellor (Research and Innovation) UMS, Professor Dr. Shahril Yusof said in his speech, in addition to that UMS was very fortunate to have the opportunity to be the co-organiser of the talk which featured leaders in the field of nanotechnology that can provide a scientific perspective, application and commercialisation to research.

“This talk is in line with UMS aspirations to convey knowledge on current issues and modern perspective,” he added.

He was speaking on behalf of UMS Vice-Chancellor, Professor Datuk Dr. Mohd Harun Abdullah. – *SS (fl)*
