Career seminar and exhibition for women

KOTAKINABALU: A seminar and exhibition on career guidance for women was held at Dewan Kuliah Pusat Universiti Malaysia Sabah yesterday.

The objective of the event is to help produce undergraduates who have both knowledge and skills to meet future career demands.

The two-day event, which was jointly organized by Sabah Women Affairs and students from UMS, was

launched by School of Social Science Dean Dr Ismady Idris.

Ismady said the first ever seminar and exhibition of its kind in the university will help the undergraduates to prepare themselves for their career path.

It will hopefully be useful to the undergraduates, especially the women, no matter which institutes they are from, he said.

Coordinator for the event Abdul

Munir Ladon said the seminar familiarised the undergraduates with the relevant institutions that protect them if they are badly treated.

It also familiarised the undergraduates with career opportunities and challenges as well as skills that are required during job interviews. Various activities were also organized during the event, such as blood donation, RTM audition, beauty exhibition and medical check-up.
