DE 27-7-2019 16 UMS set to host first smart hosp

KOTA KINABALU: Universiti Malaysia Sabah (UMS) hospital is set to become the country's first smart hospital through a partnership between the university and Huawei Technologies (Malaysia) Sdn Bhd.

UMS Board of Directors chairman Datuk KY Mustafa said the partnership was sealed a year ago and has already benefited the university particularly in the development of the hospital which is expected to complete soon.

"Through this partnership, UMS has received a lot of facilities from Huawei in terms of technology and training in information and communication technology," he said after paying a courtesy call on the Head of State at Istana Negeri, Wednesday.

The China telecommunication giant also offered state-of-the-art systems to the university's hospital with the intention of making it the first smart hospital in the country, he added.

He said as a smart hospital, its entire operations will be more efficient, systematic and fast.

"It will also be able to cater for the medical needs of patients from other countries," he said.

Also present was Huawei's Liaison Director-General Simon Ng.
