SARAWAK CONSOLIDATED INDUSTRIES BERHAD

Sarawak Consolidated Industries Bhd (SCIB) has secured a RM11.9 million engineering, procurement, construction and commissioning (EPCC) subcontract for upgrading works at Universiti Malaysia Sabah (UMS).

KUALA LUMPUR: Sarawak Consolidated Industries Bhd (SCIB) has secured a RM11.9 million engineering, procurement, construction and commissioning (EPCC) subcontract for upgrading works at Universiti Malaysia Sabah (UMS).

In a filing with Bursa Malaysia, SCIB said the contract was awarded to its wholly owned subsidiary, SCIB Industrialised Building System Sdn Bhd (SIBS), by Demi Cera Construction Sdn Bhd.

The project involves upgrading the air-conditioning system at the Faculty of Engineering building under Phase 1, Package 8 of the UMS development programme. Construction is scheduled to begin on Aug 1 and is expected to be completed by July 3, 2027.

SCIB non-independent non-executive chairman Datuk Chong Loong Men said the contract further strengthens the group's construction and EPCC portfolio while expanding its presence in Sabah.

"This contract represents another meaningful addition to SCIB's construction and EPCC portfolio and further strengthens our presence in Sabah, highlighting the group's continued growth in the region.

"Our engineering, procurement and construction capabilities enable us to deliver projects efficiently while maintaining high standards of quality and execution," he said.

Chong said the upgrading works require close coordination across engineering, procurement and on-site implementation, areas where SCIB has continued to strengthen its execution capabilities.

SCIB said the contract is expected to contribute positively to future earnings, with revenue and profit to be recognised progressively based on the progress of the works.

The project will be funded through a combination of internally generated funds and external financing where required.

The group said the latest contract reinforces its position in Sabah, where continued investment in education, public facilities and infrastructure is creating opportunities for qualified construction and EPCC contractors.

SCIB said it will continue to focus on securing projects that complement its core expertise, support sustainable order book growth and enhance long-term earnings visibility while strengthening its presence in East Malaysia.
