SARAWAK Consolidated Industries Bhd (SCIB) has secured an engineering, procurement, construction and commissioning (EPCC) subcontract worth approximately RM11.9 million for upgrading works at Universiti Malaysia Sabah (UMS).

The contract was awarded to SCIB's wholly owned subsidiary SCIB Industrialised Building System Sdn Bhd (SIBS) by Demi Cera Construction Sdn Bhd, according to a statement on Friday.

The subcontract involves the proposed upgrading of the air-conditioning system at the Faculty of Engineering building under Phase 1, Package 8 of the UMS development programme.

Works are scheduled to begin on Aug 1, 2026 and are expected to be completed by July 3, 2027.

SCIB non-independent non-executive chairman Datuk Chong Loong Men said the contract strengthens the group's construction and EPCC portfolio while expanding its presence in Sabah.

"This contract represents another meaningful addition to SCIB's Construction and EPCC portfolio and further strengthens our presence in Sabah, highlighting the Group's continued growth in the region," he said.

He added that SCIB's engineering, procurement and construction capabilities would support the delivery of the project, which requires coordination across engineering, procurement and on-site implementation.

SCIB said the contract is expected to contribute positively to future earnings, with revenue and profit recognition to be made progressively throughout the contract period based on the progress of works.

The group intends to fund the project through a combination of internally generated funds and external financing, where required.

SCIB said the latest award strengthens its project pipeline in Sabah, where investments in education, public facilities and infrastructure continue to create opportunities for construction and EPCC contractors.
