## UMS executives attend problem solving course

BP 22.05.2012 A11

**LABUAN:** About 30 executives of the Labuan International campus of Universiti Malaysia Sabah (UMS-KAL) attended a course specifically to improve their skill in problem solving and the methodology of making the right decision.

The two-day course organised by the Registry of UMS jointly

with the Administration Department of UMS-KAL, was held on May 17-18 and facilitated by Dr Noorhisham Mohd Alwi of the Malaysia Productivity Corporation (MPC) Sabah.

The objectives of the course were to train the executives to recognise the elements before embarking on any course of

action and also for them to acquire the art of creative thinking in problem solving.

They were also exposed to adapting to the cycle of dealing with problems which gives decision makers an added advantage in the course of resolution, according to Noorhisham.
