SCIB secures RM24.59M for school upgrading project

KUCHING: Sarawak Consolidated Industries Bhd (SCIB) has secured a RM24.59 million subcontract for a school upgrading project in Sabah.

Wholly-owned subsidiary, SCIB Industrialised Building System Sdn Bhd (SIBS) had accepted a letter of award from Belian Juta Sdn Bhd for the engineering, procurement, construction and commissioning (EPCC) subcontract for the proposed reconstruction works of the depilated school building at Sekolah Kebangsaan Kaingaran in Tambunan.

The project is scheduled to commence on August 10 for completion by January 22, 2029 or 29-month execution period. It will be financed through the company's internally generated funds and/or project progress billings.

Belian Juta was awarded the school's main contract by Public Works Department on June 22.

"Under the subcontract, SIBS will undertake the execution, performance and completion of the reconstruction works, including the

provision of all necessary materials, machinery, equipment, mechanical and labour required for the project.

"The latest award further strengthen SCIB's construction and EPCC project pipeline in Sabah while reinforcing the group's established track record in delivering public sector education infrastructure projects," the company said in a media release.

The latest contract is the second secured by SIBS within a week. On July 31, SIBS won a EPCC subcontract worth RM11.9 million for upgrading works of Universiti Malaysia Sabah (UMS). SIBS was appointed the subcontractor by Demi Cera Construction Sdn Bhd for the project expected to be completed by July 3, 2027.

SCIB's chairman Datuk Chong Loong Men said the latest contract win reflects the continued confidence placed in the group's project execution capabilities in Sabah's public infrastructure sector.

"Education infrastructure plays a vital role in supporting community development, and

we are honoured to contribute to creating a safer and more conducive learning environment through the reconstruction of Sekolah Kenbangsaan Kaingaran," he added.

Chong said Sabah continues to offer attractive opportunities, driven by the state's ongoing

investments in education, public infrastructure and community facilities.

"As we continue to strengthen our presence in East Malaysia, our focus remains on disciplined project selection, effective project execution and expanding our order book with quality projects

that support sustainable earnings visibility.

"Moving forward, SCIB remains committed to expanding its construction and EPCC portfolio by pursuing opportunities that complement its technical capabilities and operational expertise," he added.
