

25 Chinese students join UMS engineering course

DE 17.8.2018 6

KOTA KINABALU: Some 25 students from Wuyi University, China, are enrolled in the professional Artificial Intelligence (Fuzzy Logic) Optimization Engineering at University Malaysia Sabah (UMS).

Deputy Dean (Academic and International) Engineering Faculty, Ismail Saad, said the university is proud to organise a 16-day engineering course handled by the engineering faculty which will be participated by overseas student.

"It is a result of good cooperation between UMS and Wuyi University which will become a knowledge-

sharing field for the benefit of both universities.

"We look forward for more such programmes in the future, including cooperation in research and postgraduate studies," Ismail said at the welcoming ceremony for the Chinese students, here, Thursday.

The course will be held until Aug 24 which will give the chance to the foreign students to know Sabah more through visits at interesting landmarks in the State.

Also present was UMS Internationalization and Global Engagement Director Prof Dr Ho Chong Mun.
