TAMPARULI: A group of Universiti Malaysia Sabah (UMS) students repaired gravity water pipes at Kg Kelawat, Monday

The two-day collaboration between the residents and students of the UMS Outdoor Center (PLUMS) also saw the installation of two large capacity water tanks.

The programme's inauguration ceremony was inaugurated Livestock Production Programme Head, Faculty of Sustainable Agriculture UMS Sandakan Campus, Associate Professor Nur Hardy Abu Daud.

The project director, Kennedy Juani, said it provided a huge allocation to ensure the installation of a three-kilometer water pipe under the programme benefited a total of 40 houses which affected by the clean water supply due to the earthquake that struck last 2015 under the 'Car-

ing leads to change' themed initiative.

"More than 400 people benefited from the community programme, which solved their difficulty in getting clean water supply for everyday life.

Meanwhile, Nur Hardy said clean water supply is an essential element in everyday life of the community and he urged community leaders to continue to assist and support such programmes for the well-being of the people, especially in rural areas and Sabah.
