121 participate in UMS programme

DE 17.5.2019 12

KOTA KINABALU: A total of 121 science students participated in the Poster and Innovation (Sees) programme at University of Malaysia Sabah (UMS).

The exhibition, with the theme "Creativity and Innovation Leads to Higher Level of Thinking" was aimed at providing students with the opportunity to participate in the Sports Science programme in research and innovation courses.

The exhibition was divided into three categories namely Skill Analysis (Kinematics), Competition Analysis Identification and Development of Talents.

It also includes research and problem-solving based on scientific thinking which requires the students to be creative and artistic by applying critical-thinking.

At the same time, it was hoped that it will be the best medium to create first-class minded students to contribute to the development of sports industry in Malaysia.

The opening ceremony was officiated by Deputy Dean (Research and Innovation) FPP, Dr Denis Andrew D Lajium.
