

# Ethical hacking

DE 9.4.2017 2

**SOME** of the 11 groups of participants of the first ever Borneo Cybersecurity Challenge 2017 held at UMS in Kota Kinabalu, Saturday. The 12-hour challenge is divided into Hack and Defence Competition and Digital Forensics Challenge. The competition, started 16 years ago in the peninsula, is seen as a good platform for participants to gain knowledge or, for some, get a job with the Malaysian Communication and Multimedia Commission (MCMC). Winners will bring home RM3,000 and a chance to do internship at the MCMC with the prospect of being offered a permanent job. – Tracy Patrick
