

UMS holds International Conference on Society and Technology

TBP 25.09.2021 P. 03

KOTA KINABALU: Universiti Malaysia Sabah (UMS) through the E-Learning Center (PEP) brought together experts on education, psychology and technology to understand the process of aligning pedagogical strategies to meet the needs of today's world.

Its vice chancellor, Professor Datuk ChM Ts Dr Taufiq Yap Yun Hin said the experts shared their views through the the first International Conference on Society and Technology 2021 (ICST'21) which was held virtually recently.

"This conference brings together academics, students and international experts to understand the process of aligning pedagogical strategies in order to meet the needs of today's world.

"Technology-based learning is seen to have grown rapidly over the past two years with educational institutions taking efforts to overcome various problems that affect research and development and also the closing of physical classes.

"This marks a transition to online learning and assessment systems that meet the needs of the younger generation," he said when launching the event what was broadcast live through UMS and Cisco Webex Facebook.
