

Aquaculture sector also hit

Published on: Sunday, May 10, 2020

KOTA KINABALU: The implementation Movement Control Order (MCO) has made it difficult for Good Aquaculture Practice-certified aquaculture operators to get fish pellets, said Universiti Malaysia Sabah (UMS) Borneo Marine Research Institute (IPMB) director Assoc Prof Dr Sitti Raehanah Muhamad Shaleh (pic).

Sitti Raehanah said most pellets were imported and this forced big scale operators to downsize their operations which also affected their production.
